

NOTICE TO MARINERS

085 (T) of 2020

Issued by Brisbane Maritime Region on 12 March 2020

Area: Brisbane pilotage area

Locality: Mooloolah River Bar

Activity: Dredging and shoaling

Mariners are advised that a hydrographic survey of the Mooloolah River and its coastal bar on Thursday 5 March 2020, shows the entrance channel generally has depths in excess of the 2.5m design depth at LAT. There is an isolated shoal patch with a least depth of approximately 2.3 metres at LAT located on the western edge of the entrance channel.

Map S11-458 attached, shows the current channel. Copies of the survey plan are available from the Sunshine Coast office of Maritime Safety Queensland at Mooloolaba.

Masters of smaller recreational boats, personal watercraft, and passive craft like kayaks and canoes must remain mindful of the heightened risk to larger vessels navigating the river entrance and coastal bar. Except for entering and departing the river, these smaller vessels and passive craft should keep well clear of the coastal bar and not use it for recreational purposes.

Mariners must remain mindful that coastal bars are dynamic in nature with conditions constantly changing. Mariners must plan their crossing of the Mooloolah Bar, having careful consideration to prevailing conditions, the state of the tide, and the draught of their vessels. The coastal bar must be navigated with extreme caution.

Mariners are also reminded that the Mooloolah River entrance is defined as a coastal bar. This means that each person on board an open boat less than 4.8 metres in length must wear an appropriate life jackets while the boat is crossing the coastal bar.
